

Notice to Visiting Trainers and Their Representatives travelling to New Plymouth Raceway, Saturday 18th July 2026

We extend a warm welcome to all visiting trainers and their representatives and thank you for your understanding, patience and support during this time.

Due to the current strangles management protocols in place, there will be no on-course availability of horse yards on race days, or the night before or after race days, until further notice.

There is limited stabling available. Trainers requiring stabling are asked to contact the Racing Office in advance to discuss availability.

For horses travelling from the Red Zone, designated tie-up and wash-down areas will be located directly in front of the Race Day Secretary's Office. Both sides – including park side of tie-ups will be available. We ask that these facilities are used in accordance with the current biosecurity protocols.

The cooperation of all trainers, staff and connections is greatly appreciated as we work together to minimise the risk of disease transmission. It is important that we all play our part to ensure the health, safety and welfare of everyone involved—both equine and human.

For further enquiries or additional information, please contact the Racing Office.
